

LETTER

Dear Mr. Rodrigues,

FACTUAL BACKGROUND

Our investigation reveals that three former Quantivia employees — Sarah Lin, Marcus Webb, and Hiro

Tanaka — joined your company in October 2025 and have since incorporated Quantivia's proprietary scoring algorithms into your 'PinnaclePredict' product. Additionally, a confidential client dataset containing over 1.2 million customer records was transferred via personal cloud storage accounts prior

to their departure, in direct violation of their non-disclosure agreements.

LEGAL BASIS

The conduct described above constitutes a violation of the Defend Trade Secrets Act (18 U.S.C. § 1836) and the Massachusetts Uniform Trade Secrets Act (Mass. Gen. Laws ch. 93, § 42). These laws provide for significant civil remedies, including injunctive relief, monetary damages, and recovery of attorneys' fees and costs.

DEMANDS

1. Immediately cease all use, reproduction, and distribution of any Quantivia proprietary algorithms, source code, and datasets.
 2. Conduct a forensic audit of all systems and repositories at Pinnacle Data Solutions to identify and quarantine all Quantivia materials, overseen by an independent third-party forensic firm.
 3. Return or certify the destruction of all confidential materials, including any derivatives or copies.
 4. Provide a sworn declaration from each of the three former employees detailing the materials accessed, copied, or transferred.
- remediation costs.

CONSEQUENCES OF NON-COMPLIANCE

If Pinnacle Data Solutions does not comply by the stated deadline, Quantivia Analytics will file suit seeking injunctive relief, compensatory and exemplary damages, and attorneys' fees. We will also refer

the matter to the appropriate federal authorities for potential criminal prosecution under 18 U.S.C. § 1832.

Nothing in this letter shall be construed as a waiver of any rights or remedies available under applicable

law, all of which are expressly reserved. This letter is written without prejudice to any and all rights, remedies, and claims, whether known or unknown, that may exist now or in the future.
